CHURCH PINE - BASICALLY SUBMERGED VEGETATION
ROUND - FLOATING LEAF PLANT & SUBMERGED VEGETATION

1. CHURCH PINE - 25 DIFFERENT KIND OF WEEDS.

GOOD REPORT, MANY DIFFERENT TYPE OF WEEDS BUT NO
WEED IS TAKING OVER. HAVE A GOOD DIVERSE COMMUNITY
WHICH MEANS WE HAVE 0.93 REPORT WHICH IS VERY GOOD
FOR WISCONSIN LAKES.

2. ROUND LAKE

20 SPECIES - SOME SPECIES ALL OVER.

GOOD DIVERSITY OF WEEDS. A COUPLE OF THICKER GROWTH
GOOD DISTRIBUTION OF WEEDS

CURLY LEAF - POND WEED

BIG LAKE HAS SOME PROBLEMS

PINE LAKE HAS 2 ACRES IN 2 BAYS ON EASTSIDE OF LAKE

ROUND LAKE HAS MORE SEVERE PROBLEMS BUT NOT AS BAD AS BIG LAKE

NO CHEMICALS CAN BE USED IN CERTAIN AREAS OF CHURCH PINE &
ROUND LAKE - BECAUSE OF FISHERIES

BAY EAST OF ISLAND - 20' WIDE - WEED CUTTING
BETWEEN CHUCH PINE & ROUND LAKE

ROUND LAKE- 2 ACRES - 20' WIDE CHANNEL - CUT ONLY SOUTHWEST BAY

BIG LAKE - ELIMINATE CURLY LEAF PONDWEED
BIG LAKE MACROPHYLE MANAGEMENT MEASURES.
WANT VOLUNTEERS TO WATCH FOR EUROASIAN WATER MILFOIL
